

# STONY PLAIN SUN.

VOLUME TEN

STONY PLAIN, ALBERTA, THURSDAY, OCT. 10, 1929.

Whole Number 479

**Don't  
buy any car  
until you have  
driven  
Chevrolet**

IT'S all very well to listen to So-and-so's opinion of car values, but after all, the person whose opinion counts most is YOURSELF. It's all very well to sit back and wonder how Chevrolet can produce a really high-class Six . . . put a high-compression, valve-in-head engine in it . . . employ Fisher Body genius to create and build a series of magnificent bodies for it . . . equip it in the most detailed and up-to-the-minute fashion . . . and sell it at the price of a four.

The unmatched resources of General Motors, backing up Chevrolet's own tremendous facilities, explain all that, of course. But how much more satisfying to test it all out for yourself . . . behind the wheel of the new Chevrolet Six. That is why we urge you . . . no matter how many nice things you have heard or read about Chevrolet . . . to DRIVE CHEVROLET before you buy any car.

If you don't sell yourself a Chevrolet, nobody else is going to do it. Please don't feel you are obligating yourself in any way. It's a pleasure for us to place a Chevrolet Six at your disposal.

### The W. I. Conference.

Stony Plain Constituency conference, held last week at Smithfield church, near Duffield, over which Mrs R E Wood presided, had 48 members in attendance.

Mrs W-C Short and Mrs McG. Smith gave addresses and Mrs Bowstead rendered two vocal solos during the afternoon program.

Excellent reports were received from the 4 branches; Winterburn, by Mrs A Lord; Stony Plain, by Mrs R M Oatway; Tomahawk, by Mrs A Dekuse; Duffield, Mrs F J Francey.

Among the reports presented were those of Mrs R E Wood, Legislation; and Mrs R M Oatway, on Canadian Industries.

All the officers were re-elected. Duffield W.I. served a dainty luncheon; and served tea at the close of the meeting. Mrs F W Yeats entertained with two vocal numbers and Mrs Heap with two humorous readings.

The address of welcome was made by Mrs F Francey, and responded to by Mrs F Wellborne.

The 1930 conference is to be held at Winterburn Community hall.

### Walther League News.

The regular business meeting of the local W-L was held Sept 25. About 30 members were present. The society again gained 30 new members. The entertainment committee gave a report, and announced that the program for the next social, on Oct 13, has been prepared. Members are requested to bring their W-L Messenger to the next meeting, to study the topic: "A Missionary Church." The topic study is conducted by Mr Rosinau.

It was also decided to have a Hallowe'en Social on the night of Thursday, October 31st.

In abiding with the ten objects of the Walther League all meetings are both recreational and also are educational.

### Threshers' Limitations.

Some threshermen appear to be unmindful of the provisions of sec. 23 of the Noxious Weeds Act, requiring them to get permission of a farmer before crossing the latter's land with their machines. A fine up to \$100 is provided for such infraction. A case in point has arisen in Bright Bank district, where 2 fences were taken down, and the machine dragged for a half-mile over new, clean land. The farmer has appealed to Weed Inspector Heibert, to take action.

## Markets For Western Products

The story of the marketing of the grain of the western provinces of Canada is a long, complicated, but exceedingly interesting one. It is a record of one acute problem arising in succession to another as the years passed and conditions both at home and abroad brought about radical but inevitable changes. It is a history allied with heroic efforts in breaking new trails, the grappling with the seemingly impossible, in the endeavor to solve first one problem and then another, thus removing the difficulties that lay in the path to successful, prosperous, western agriculture.

Twenty-five or thirty years ago, the chief cause of complaint was the then existing elevator combine, closely linked with the transportation companies. The passage of the original Canada Grain Act, with its provision of the leading platform, went a long way towards the removal of that grievance.

Then, with rapid increase in settlement and consequent production in the early years of the present century, lack of railway facilities resulting in annually recurring blockades, caused enormous loss to the producers. The great era of railway building largely solved that problem.

The elevator problem, involving questions of grading, dockage, charges for services rendered, depressing of prices, etc., still remained acute. The result was the inauguration of Government-owned and operated elevators in some provinces and farmers' co-operative elevators in Saskatchewan, the creation of the United Grain Growers, and constant revision and amendment of the Canada Grain Act.

Following the war, and the enormous increase in acreage brought under cultivation by the Greater Production campaigns, coupled with the complete demoralization of world trade, falling prices, and lack of credit and buying power in Europe, and, in particular, the abandonment of the war-time Wheat Board, western grain growers found themselves in a serious predicament, faced with prices barely equivalent to, even below, the cost of production. With courage and unswerving initiative western farmers grappled with the problem and worked out their own salvation through the organization of their great Wheat Pools.

Conditions improved, marketing became more scientific, prices somewhat more stabilized. Then came the crop of 1928, the largest in volume in the history of the west, but, owing to climatic conditions, one of poor quality. Within two years, too, the "combine" and the motor truck had come very largely into use, with the result that the grain poured into the elevators not only in unprecedented volume, but with unprecedented rapidity. The building of good market roads likewise served to speed up deliveries.

The net result was a situation which, while providing employment for a huge army of harvesters, and an enormous volume of traffic for the transportation companies, left little margin of profit for the grower of the grain. Complaint was almost universal against the Board of Grain Commissioners, it being very generally felt that it was "asleep at the switch," and had not made even reasonable efforts to cope with the situation which had developed. The old Board was replaced by a new one which has the confidence of the farmers and from which better things are expected.

Beneficial as the operations of the Pools have been, there has been developed in some quarters, and notably in Saskatchewan, a feeling that the maximum benefits to be derived from united selling cannot be realized until every bushel of wheat grown in Canada is marketed through one agency, namely, the Pools, and that, human nature being what it is, this cannot be secured through wholly voluntary efforts, and consequently the minority should be compelled by legislation to throw in their lot with the majority and made to deliver their wheat to the Pools.

While this agitation is being carried on, a new situation has developed. Owing to a large carry over from the 1928 crop, and the rapid harvesting and delivery to the elevators of this year's crop, and with a manifest reluctance on the part of European buyers to purchase Canadian wheat at a price commensurate with its value and production cost, there is practically no movement of grain out of Canada at the present time. The result is that all forms of storage in this country are, at the time of writing, almost filled up, and embargoes on shipments in effect.

The situation is believed to be only a temporary one, and that, as soon as other wheat exporting countries, now selling below the price which Canada demands, are out of the market, there will be a call for Canadian wheat and a price obtainable acceptable to the Canadian producer.

However, with the steadily increasing size of the Canadian wheat crop, and increases in other countries as well, western farmers must inevitably take a keener interest than ever before in the whole subject of finding and developing export markets for Canadian products. The possibilities of the awakening Orient call for close investigation and expert study. Such subjects as the effect of Canada's Government-owned merchant marine, operated at a loss, in opening and developing new markets require careful consideration as to whether the direct operating loss is not more than offset in national gains and profit through the development of export trade.

## Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The latest remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times the force of acid. The results are immediate, with no bad after-effects. Once you learn the fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is superior. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## London Suffers From Drought

According to Records, Condition worst in Seventy-One Years

London is experiencing the worst drought on record in 71 years, a 32-day lack of substantial rainfall eclipsing the dry period of the summer. The Lea River, supplying a considerable area of eastern and northeastern London, is beginning to fall, causing acute anxiety.

Garden watering from hoses or outside taps was stopped by the authorities several months ago and a special assessment levied for this service will be reduced by half at the next date of payment, the water board promises.

## ST. VITUS DANCE

A Disease Of The Nerves Which Must Be Treated Through the Blood

St. Vitus Dance is a disease of the nerves brought on by a morbid condition of the blood. It is a common disease with children, but sometimes attacks adults. The treatment of this trouble is through the blood, because rich, red blood is the life food of the nerves. In this way Dr. Williams' Pink Pills have proved beneficial in even the most severe forms of this trouble, because they enrich the blood supply, thus carrying the richest food to the nerves. In proof of the value of Dr. Williams' Pink Pills in cases of this kind we have the statement of Mrs. William Stead, Warton, Ont., who says:—"My eldest girl at the age of nine years suffered from an attack of whooping cough which left her very weak, and finally developed into St. Vitus Dance. She was under a doctor's care, but with no beneficial results. We also tried other treatments, but with no better results. To make matters worse she was taken down with measles. Against all odds she was called in, as she became so weak, and her limbs so tremble that we had to tie her down. A little hand wagon I thought a change of air and scene might help her, so we sent her by boat to Port McNicoll, a distance of about a hundred miles. She seemed to improve while there, but as soon as she came home her strength was gone again. I took her to another doctor, but with no better results. I was distracted to see how helpless she was becoming, so decided to give Dr. Williams' Pink Pills a trial. I got six boxes, and they did what neither doctors nor other remedies had even started to do. They built her up completely; she St. Vitus Dance disappeared, she has no sign of weakness and can run and play with the other girls, a thing she could not even try to do for about eighteen months. She walks to and from school, a distance of about a mile, which, of course, is proof of her present good health. I have much to praise Dr. Williams' Pink Pills for, and always recommend them in all cases of weakness."

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Use Of Combines

More reaper-thresher combines have been in operation in the Brandon district this year than ever before, despite short grain crops.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

## Going To Brandon

Dr. Buckley Is New Agrostologist At Dominion Experimental Farm

Dr. G. F. H. Buckley has recently been appointed to the position of agrostologist at the Dominion Experimental Farm, Brandon. Dr. Buckley was born in Halifax, N.S. He received his Bachelor of Science degree from the University of Alberta in 1920. On his return to Edmonton he became assistant professor of field husbandry, having special charge of the field experimentation. At the Brandon farm, Dr. Buckley will continue the corn breeding investigations which were commenced in 1925. This work is being carried on with a view to developing a resistant, early maturing variety of corn that will give good yields for fodder and silage.

## A Wonderful Machine

Transforms Music Into Ribbon Of Light and Respects To Every Change

Music was transformed into a ribbon of light and made to write its soul characteristics on a cloth screen at Steinway Hall, New York. When low, pure tones were sounded the strip rippled smoothly like wave motion travelling along a rope, but when harsh, discordant sounds were made, the shining line writhed and contorted like an agitated snake. For all graduating of harmony the line showed distinctive waves, different for each sound, even down to discrepancies in tone too fine for the ear.

The instrument is a development of the Osio, which has been used for some time to photograph voice and music characteristics. The new device substitutes a moving picture for a "still." It is a mirror, vibrating under control of an electrical current from a microphone that picks up the sounds to be pictured. This mirror reflects a beam of light through revolving mirrors. It was developed by William Baird White, acoustic engineer of the American Steel & Wire Co., and C. Anderson, engineer of the Westinghouse Electric & Engineering Co.

Music students are given a pattern of a perfect sound and attempt to reproduce it in the light.

"It seems certain," said Mr. White, "that improvements can be attained in this way, but it also seems certain that no amount of effort will transform a good clerk into a great artist, for one of the things demonstrated is that each artist produces patterns, as individual as his signature, and although others may be able to imitate these patterns fairly well, apparently no one else can reproduce them exactly."

The Osio is designed to calibrate the harmony of musical instruments, and detect imperfections; whether in tones from wires or strings, or reverberations of sounding boards. Mr. White said that it is found sounding boards sometimes reverberate better at some points in the scale than others.

Some gourds weigh as much as 30 pounds.

## Delegation Sails For Japan

Party Has Gone To Tokyo For Preliminary Conference

Just what will loom up as the chief subject for consideration at the forthcoming meeting of the Institute of Pacific Relations at Kyoto, Japan, cannot be known until preliminary discussions are held, said Lord Hallahan, on his arrival at Ottawa. Lord Hallahan heads the British delegation, several members of which spent a few days as guests of Their Excellencies the Governor-General and Lady Willingdon, before proceeding west to Vancouver. They sailed for Japan on October 3.

## Woman Aviator Killed

Miss Josephine Callahan, armless woman aviator, was killed when a licensed plane she was piloting crashed in a cotton field near Abilene, Texas. Miss Callahan, said to have been armless since birth, had a special arrangement on the control stick for handling the plane with artificial arms.

## Head Colds relieved with vapors

## The right way to redye Finest Silks

TEXTILE manufacturers always use special dyes for silk or wool. They know that is the only way to secure the most perfect results. The makers of Diamond Dyes are the first to enable home users to follow this plan.

Next time you want to dye some of your more valuable articles of pure silk or wool, try the special Diamond Dyes in the blue package. They will give these materials clearer, more brilliant colors, with greater depth and permanence than any "all purpose" dye.

These special Diamond Dyes are just as easy to use as ordinary dyes. The white package Diamond Dyes, they contain the highest quality aniline dyes money can buy. That's what makes them go on so smoothly and without spotting or streaking. That's the secret of their brilliance; their resistance to sunlight, wear, and washing.

The white package of Diamond Dyes is the highest quality dye prepared for general use. It will dye, or tint, silk, wool, cotton, rayon (artificial silk), or any mixture of materials. The blue package is a special dye for silk or wool only, with which you can dye your valuable articles of pure silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package dyes will dye every kind of goods, including silk or wool. Your dealer has both packages.

**Diamond Dyes**  
Sun Proof

EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality aniline dyes money can buy. And it is the only dyes of that color. They are the life of the color. They are the source of the rich colors; brilliance and permanence.

# World's Grain Exhibition To Be Outstanding Event In The History Of Canada

The World's Grain Exhibition and conference to be held in Regina in 1932 promises to be the greatest international event ever staged in the Dominion of Canada. Invitations are being given world-wide distribution, and it is anticipated between fifty and sixty countries will be represented.

The year 1932 also marks the fiftieth anniversary of the settling of that part of the prairies which now constitutes Saskatchewan, which makes it a fitting time to hold such a world-wide event.

The Federal Minister of Agriculture, Hon. W. R. Motherwell, is chairman of the general committee, and through his good offices the Federal Government at its last session voted an initial grant of \$1,000,000 in order to allow the committee to proceed with the preliminary work. This is being directed by J. A. Mooney, the manager, and D. T. Elderkin, the secretary. The temporary services have also been secured of Ernest Rhoades of the Federal Department of Agriculture, at Ottawa, whose experience as secretary of the World's Poultry Congress held at Ottawa, in 1927, will be extremely valuable in getting this new world event off to a good start.

Steps are now being taken to prepare an announcement and prize list for world-wide distribution. This publication will be unique in that it will contain a list of the most valuable prizes ever offered for any agricultural products. One example of this is the class for hard red spring wheat which carries a first prize of \$2,500 and fifty other prizes ranging down to fifty dollars. Total prizes will amount well over \$200,000.

Included in the competitive classes are wheat, oats, barley, corn, rye, buckwheat, rice, millet, field peas, field beans, and the seed of flax, hemp, alfalfa or lucerne, red, white, sweet and white Dutch clover; the grasses, timothy, bromes, red top, bent, Kentucky blue, Canada blue, the Fescues and the Agropyron species; sunflower, field roots and garden vegetable seeds.

Such a prize list provides classes for every province in the Dominion and for a great many other countries.

The competitive classes, international, national and provincial educational exhibits, and commercial displays may be termed the spectacular side of the event. This is the other side from which Canada hopes to gain much, and that is the conference.

Thousands of research workers along grain and seed lines are busy in all parts of the world attempting to solve the problems incidental to the production and marketing of these products. In 1932 Canada will be the mecca for these experts, and the farmer will be able to hear and question these men, and it is hoped learn the solution of many of the problems with which he is now confronted. Everything will be discussed from soils to markets, plant diseases and insect pests, and farm machinery.

Grain from this year's crop may be the winning entry, and it behooves the grower and prospective exhibitor to commence his selecting at once. The selection for seed for the 1930 and 1931 crop is also a point which growers would do well to keep before them, with the possibility of entries in the World's Grain Exhibition always in view.

He who knows only his own side of the case, knows little of that.

Sondagisme - Skik, Stockholm.

W. N. U. 1806

## Another Titled Rancher

Kormer Russian Prince Is Raising Muskies In Alberta

Alberta has added one more to her list of titled ranchers. This time it is a Russian prince, remotely related to the defunct royal family through an alliance in the days of Peter the Great, but of recent years more or less a wanderer on the face of the earth in a search for a happy home where Bohemians cease from troubling and princelings are at rest.

Prince Leo Goldstein, twenty-five years old and married just about a year, is this latest royal rancher. He has bought over 400 acres of land on the McLeod River, five miles south of Edmonton, right in the heart of the big game country, and there he is going to raise—muskies!

On the land there is a lake which covers 150 acres, and this is to be the habitat of the colony of muskies the prince plans to develop. There are already a few hundred furry rodents on the place, but a much larger number will have to be introduced to make the ranch a paying proposition. The lake is to be enclosed with three miles of wire fencing at a cost of \$2,000.

Much of the farm work is to be done by the prince himself, though he will have a manager and a few helpers. He has studied fur farming intensively, and has a number of theories that he intends to put to the test of practice, these having been endorsed by the professors of agriculture of Louvain University, where he studied for some years. It is not expected, however, that the prince will pay dividends until about 1932.

## Airplane Shipments Comprise Many Things

Great Banking Firms Use Service For Sending Bullion

Even crooks are finding the aeroplane useful. An amazing case of gambling machines, for use at Deauville, being smuggled by aeroplane into France recently came to light. The machines were made in England, and it is alleged that they were taken to France by an English airman, who smuggled them through the Customs at Le Bourget, and sent them to Deauville motor cars.

Perhaps the most striking of all tributes to the business value and dependability of the aeroplane is to be found in the fact that great banking firms now send cargoes of bullion by air almost every day. The "bullion aeroplane" with its precious cargo in charge of an armed guard, is an established feature air traffic.

A man has been sent as cargo in a goods aeroplane. Missing the last passenger machine, he posed a cargo plane ready for flight. The goods were labelled with the name of the town to which he wished to go, so he had himself packed up and labelled and put in with the heat of the cargo. The aeroplane reached its destination, and the man, having paid the freight charges on himself, was duly delivered.

Mistress: "But why should you wish to leave after being in my service for 45 years?"

Maids: "Well, ma'am, I don't want to get into a rut."

## Honor Canadian Pacific Men

Life-saving certificates of the Royal Canadian Humane Society were recently presented at Port McNicoll by Hon. Wm. Finlayson, Ontario Minister of Lands and Forests, to Car Inspector Alex. McCullagh, No. 1; Constable Harry Gryes, No. 2, and Chief Clerk J. A. Davidson, No. 3, all Canadian Pacific employees stationed at Port McNicoll, who last March rescued from drowning Mrs. Gaudreault, her 8-year-old daughter and Margaret Swales, who were crossing the lake to Victoria Harbor to Port McNicoll, when the ice gave way. In making the presentations Mr. Finlayson stressed the fact that railroad men were at all times cool and collected at a crisis.

# Growth Of Juvenile Immigration From Britain Is Satisfactory To Colonization Officials

## Results Of Tree Planting

Success Of Work On Prairies Is Very Apparent

Advent of a dry season this year calls fresh attention to the work being done by the Forest Service of the Department of the Interior, in distributing free trees to prairie farmers. Approximately 8,000,000 seedlings and cuttings are now being sent out annually, and travellers in the western provinces can see for themselves the success of the work. They find to increase precipitation of moisture, though this tendency is not great on the plains. They help to regulate water supply, making stream flows more continuous. They also provide shelter for man and beast alike, a considerable amount of the work being done in the vicinity of the prairie.

This is not to say that the widespread planting of trees will abolish all fears of prairie drought. But trees will do a little towards increasing rainfall, and will do much towards conserving moisture in the soil. For this reason, quite apart from aesthetic grounds, the government must be congratulated on its work, and the farmers encouraged to avail themselves of the free service offered—Manitoba Free Press.

## Sage Brush As Feed

Those Of Western Plains Superior To Many Of The Grasses

Analyses made by the Dominion Chemist at Ottawa, show that a number of the sage brush of the western plains possess far percentages of protein, especially in the younger plants. In this respect they are superior to many of the grasses. According to authorities, many species of sage brush are forage plants of considerable value, especially for sheep. One author states "whole bands of sheep will leave all other forage and feed on sage-brush for a day or two at a time; after that they may not touch it for days or even weeks."

## White Blackberries

A Georgia gardener two years ago, found a white blackberry bush in the woods. He took a cutting from it and succeeded in cultivating white blackberries, the latest horticultural freak. The white berry tastes the same as the black, but it has not yet been determined whether the bushes will be fertile.

Eighty dead dogs were taken by Commander Byrd on his Antarctic expedition.

Plans for considerably increasing the flow of suitable British settlers to Canada were discussed at the annual conference of officials of the Colonization Department of the Canadian National Railways, which was held at the headquarters offices in Montreal, recently.

The chief matter under discussion at the conference is British immigration. Satisfaction was expressed at the considerable increase shown in this class of settlement this year over the previous season, and plans were discussed which are calculated not only to bring out a greater number of Britishers suitable for land settlement, but also to improve still further the conditions under which they are being settled.

Dr. Black reported having had an interesting conference with Rt. Hon. J. H. Thomas, during his visit to Montreal. The growth of juvenile immigration from Britain and the manner in which the young lads who have come out to farms are making good, was one of the matters furnishing considerable satisfaction at the conference. R. M. Fym, superintendent of juvenile immigration for the railways, reported that since arriving in Canada, he had been able to visit some of the boys who had come out this year and was greatly pleased at the progress they were making and with the good class of homes on which the boys were placed. He had been impressed with the work such organizations as the Rotary Clubs were doing in taking a brotherly interest in the British boys who have been placed on farms.

## Increases Egg Production

Experiments Show Advantage Of Open Windows In Poultry House

Experiments at the University of Wisconsin show that the opening of the windows of egg-poultry houses is nearly as effective in exposing hens to the ultra-violet rays of a quartz mercury lamp or feeding them cod-liver oil. The tests were supervised by E. B. Hart and J. G. Halpin, heads of the Agricultural Chemistry and Poultry Husbandry Departments, respectively.

Eight pens of pullets, consisting of 35 birds each, were used to compare different methods of keeping the flock from October to the end of April. A total of 2,337 eggs was laid during the seven-month period by the pullets kept in houses where the windows were kept closed. The production was raised to 3,261 eggs when the birds were treated daily with the quartz mercury lamp. A third pen which was both irradiated and exposed to the sun made the highest record, its production being 3,269 eggs.

## A New Fish Story

A genie dwells in the salmon runs of the Fraser River. Four men from New Westminster, were shooting down the fast currents in a boat recently, tired and discouraged, for what had started out as a happy hunting and fishing trip, and yielded them naught but bad temper. There was a splash of water and something glistening shot over the boat's gunwale two and a half feet above the water. It fell at their feet, flopping desperately. Twelve pounds it weighed, a salmon.

Professor: "I have succeeded in making many animals understand me, but never the teacher." Assistant: "Try talking American to them."—Il Travaso, Rome.

## Advises Zones For Campers

Superintendent Of Prince Albert National Park Would Please All Types

J. A. Wood, superintendent of Prince Albert National Park, speaking before the Board of Trade Executive, at Saskatoon, advised dividing of the park into zones in an endeavor to please all types of campers.

In the southern areas, containing Lake Waskesiu, he would have grounds suitable for cottages and tents for those who desire conveniences of many descriptions and have a distaste for tenting.

In a central area there would be ground for "semi-campers." These would provide tenting accommodation but include modern conveniences.

For those who prefer real camping, canoe trips and portages, the northern area would be reserved. Those who used this section would be what Mr. Wood termed "100 per cent. campers."

He believed the area unique in that within its boundaries was a tableland which was really in the centre of the province.

Fish were in abundance and during the commercial fishing years of 1920 to 1926, the annual official catch amounted to about 60,000 pounds. To this could be added at least 25 per cent.

The cape theme so smart in grown-up styles has entered the junior mode in military cape coat. Illustrated in navy blue homespun it is quite the most fashionable and practical idea of the moment for girls of 8, 10, 12 and 14 years. The turn-over military collar is joined to a band that fits snugly about the neck. A huge brass button at neck level, one at waistline holds the garment closed, and adds decorative note. A stitched belt defines waistline. Style No. 604 is made at 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100. It takes but 2 yards of 54-inch lining. Lacquer-red, suede finished woolen, tweed in reddish-brown tones, bottle green velveteen, almond green wool velour, and brown and beige checked woolen are ultra-new and chic for this attractive cape coat. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## History In Narrative

"Pages from Canada's Story" Of Particular Interest To Pupils In Western Schools

"Pages from Canada's Story," by Helen Falk, is bound to be a considerable aid to students of history, particularly to those in our public schools round the age of eleven. Homeopaths claim that their formula and method of taking medicine is more advantageous to patients than the prescriptions of allopathists, and Miss Falk can certainly claim that placing before pupils of eleven the history of Canada in narrative form will create a more lasting impression upon their minds.

A great Frenchman, Rousseau, stated that "the book which, to my thinking is the happiest treatise on natural education is Robinson Crusoe," and it is apparent that the author of this little book realized that children will absorb those incidents connected with the victory events of our country's history, simple portrayals of character, and graphic descriptions of locations, more easily than a precise chronology of events, wearisome through sameness, tedious in its attempts at analysis and redundancy of phraseology.

In these word pictures, the author has successfully endeavored to place the essential facts clearly before the eyes of the reader, which instantly photographs them upon the mind, thus aiding the memorizing of them.

Extreme care has been taken in choosing the most vital and colorful events which appeal to the imagination of the child, and most diverging from the actual history as it has been written particularly in the interest of pupils in Western schools the story of Western development receives more descriptiveness.

The author has studiously avoided redundancy of phrasing, the use of hard words, and verbosity, all of which will be to the benefit of the children for whom it is written. It is not written for the historian or erudite person as is readily seen from the sketchy character of constitutional changes.

Its main educative feature lies in the vivid descriptions of early pioneer life. The dangers, struggles and tragedies of the pioneers who laid the foundation of this great nation, which cannot be too emphasized, as we are all prone to ignore the sacrifices and terrible experience of those who "built better than they wot of." To forget that but for their supreme daring, patient endurance and superb courage the conditions which prevail today to any noting of the retention of the country, would not have been attained.

Miss Falk has produced something better than a text book, she has produced a record of outstanding events which will inevitably appeal to the scholars in our schools and prove both an incentive and fundamental ground for a more exhaustive study of Canadian history, and after all the greatest principle in education is to create a desire for knowledge, to rear the child to thoughtful and pour fresh instruction over the mind.

The avoidance of dates and tedious details is more of an advantage than otherwise. By taking periods instead of years, the author has been able to fix the main features of transpiring events and the chief characteristics of the participants in them more surely in the minds of children.

By so doing she has reached the happy height of appealing to the sympathy and understanding of her readers, which of necessity must all them with pride of ancestral triumphs and achievement, and incidentally a glow of patriotism. Who shall say that some of the children for whom the book is written may not be stung with some thought whose splendour may impel them to prove as great, if not more heroic, than those characters whom the author has depicted with a sure pen and clarity of insight.

Greatest thought and intense feeling come like instincts unawares to those who rise above mediocrity. Yes, certainly Miss Falk has given to the schools something more than a few pages from Canadian history, something more than a text book, a compilation of the best inspiring legends of Canada's annals, vivid character sketches which impinge themselves upon the youthful mind, and best of all a well spring from which her readers can draw inspiration.

The book is splendidly illustrated, and as pictures not only have a great appeal to the young, but are longest remembered, they will materially help forward the objective of the authors.

## SUNDAY SCHOOL LESSON

OCTOBER 13

KEEPING FIT FOR THE SAKE OF OTHERS

Golden Text: "Know ye not that your body is a temple of the Holy Spirit which is in you, which ye have from God? and ye are not your own, they were bought with a price; glorify God therefore, in your body."—1 Corinthians 6:19, 20.

Lesson: Daniel 1:8-20; Corinthians 9:19-27; 1 Timothy 4:1-12; 2 Timothy 2:1-5.

Devotional Reading: Psalm 66:1-4, 16-20.

## Explanations and Comments

The young men who gave up wine and dainties for water and plain fare were strong both physically and intellectually. Their fine appearance was noteworthy; and, best of all, not only were they fairer and healthier for their abstinence, but their brains were clearer and they had more knowledge and skill in all learning and wisdom.

The result of the experiment was no surprise to them. A newspaper contains an account of an experiment made in the village of Hickington, England, which was a surprise to the friends of themselves. Some of the villagers were so goaded by the taunts of the keepers of the beer-houses because of their Liberal political opinions that they formed a league among themselves to boycott the beer-houses for twelve months. At the end of a week the keepers of seven out of the eight beer-houses found that they would have to give up their business, and the advantages to pocket and health of the abstainers were evidently so great that many of their fellow-villagers joined them. Almost the whole village are now members of the Women's Temperance League," as it is now called, for its political character has been lost sight of.

All the world knows that food and drink wonderfully affect body and mind, that intoxicating drinks and sumptuous diet are harmful to both. Insurance companies have proven this; their tables show that intemperate habits shorten life. Physicians not only see the direct ravages made on the body by excessive eating and drinking, but they know it is more difficult to cure a moderate drinker of disease than traceable to drink than it is a total abstainer. Dr. Woods Hutchinson, in "A Physician's Straight Talk on Alcohol" says: "An amount of alcohol which one man might seem to consume with impunity may be seriously injurious to another; and daily consumption, which will produce not the slightest symptom of intoxication, or even of discomfort, or headache, may be slowly and fatally damaging the cells of your liver or kidneys. The conviction is growing among pathologists that the tissues of many moderate drinkers are damaged in this insidious way, without their being in the slightest degree conscious of any injury or even discomfort. You will naturally wonder what alcohol has done to you, until the post-mortem—and then the question won't interest you much."

Minard's Liniment for Warts.

One kind of enemy is a friend who does not oppose you when you are wrong.

## When Babies Cry

Babies will cry, often for no apparent reason. You may not know what's wrong, but you can always give them Castoria. This soon has your little one comforted; if not, you should call a doctor. Don't experiment with medicines intended for the stronger systems of adults! Most of those little upsets are soon soothed away by a little of this pleasant-tasting, gentle-cleansing children's remedy that children like.

It may be the stomach, or may be the little bowels. Or in the case of older children, a sluggish, constipated condition. Castoria is still

## Breaks Up Gas In the Stomach

Don't suffer from dangerous gas pressing around your heart, from sourness, acidity, bloating, or from indigestion. Stop "gassing." Whenever you need quick relief, take a tiny blue-tinted Magnesia—powder or tablets. It keeps the stomach sweet and strong, and is entirely perfect. At all good drug stores.

## Permanent Civil Servants

1,900 Employees Of Federal Government Attain New Status

With the passing of an order-in-council, which has an important bearing on the pensions branch of the Department of Penitions and National Health, 1,900 employees in this branch become permanent civil servants. It dates from June 1. The pensions branch of the department has now been made permanent, and the civil service commission has classified the employees engaged in this work.

About 450 government employees in Ottawa are directly affected by the change; about 450 in Toronto, 250 in London, Ont.; 155 in Vancouver, 84 in Winnipeg; 72 in Calgary, and smaller numbers at other Canadian cities where the department operates hospitals for disabled veterans.

**Good-bye Asthma.** Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape from a tyrant. Never can they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

A power site of more than 20,000 horsepower has been discovered in the Tongass National Forest in southeastern Alaska.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Eighteen years were required to make huge gates of Henry VIII's Chapel in Westminster Abbey.

## From Youth to Age

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

MADE BY DR. J. C. PINKHAM, LOWELL, MASS., U.S.A.

Gave Police the "Jump"

What was thought to be a "time bomb," opened in haste by post-office employees at Ranger, Texas, was found to be a quantity of Mexican jumping beans bumping against the tin lid of their container.

the thing to give. It is almost certain to clear up any minor ailment, and could by no possibility do the youngest child the slightest harm. So it's the first thing to think of when a child has a coated tongue; won't play, can't sleep, is fretful or out of sorts. Get the genuine; it always has Chas. H. Fletcher's signature on the package.

## C. N. R. BRANCH LINE WORK IS WELL ADVANCED

Winnipeg.—Considerable progress has been made by the Canadian National Railways with the construction of branch lines on the prairies during the summer, according to H. A. Dixon, chief engineer of the western lines of the company.

Of the 588 miles of the new line in Saskatchewan and Alberta for which authority to build was granted by parliament at its last session, work has been proceeding on 418 miles. In some cases, grading has been as much as 70 per cent. finished, and on the Aberdeen-Melfort line, 25 miles of steel have been laid in an easterly direction from the junction with the Oshewah subdivision at Wakaw. There will be a continuance of all work on these branch lines until weather conditions no longer permit.

Although the program was one of the heaviest ever undertaken by the company, only 150 miles have had no work done on them. However, plans are prepared to begin work on this mileage next year and the assurance is given by Mr. Dixon that the program will be fully completed within the three-year period defined by parliament.

In addition to this program, the company has also succeeded in putting steel into the Sheritt-Gordon mine over the branch line authorized last fall and in practically completing the first lift of ballast for Fort Churchill over the 90 miles of grade upon which a skeleton track was laid last winter. The engineers in charge expect to have this piece of track in such shape early next summer that through freight and passenger trains will be able to operate between The Pas and Churchill by the end of July at the latest.

## Predicts New Legislation

Resolution by Government To Prohibit Liquor Exports Is Expected

Ottawa, Ont.—The Ottawa Evening Journal says: "The announcement by Premier MacKenzie King that the government has not the power to prohibit the export of liquor to the United States is interpreted in well-informed political circles to indicate that at the next session the government will introduce legislation to ban the export of liquor across the border."

"This would be done by refusing clearance to shipments intended for American consumption."

"If the government sponsors a resolution to prohibit liquor exports, there is no doubt the measure will carry in the house."

## Indians Demand Rights

Northern Ontario Chiefs Base Claims On Treaty Of Utrecht

Sudbury.—Chiefs and delegates from all the principal Indian Reservations in Northern Ontario are meeting here at a general council to seek restoration of their ancient rights and privileges in the forests where their forefathers reigned supreme. The Indians argue their people are unfitted for modern civilized life yet, that their livelihood is bound up in streams and forests and that trapping is practically their only source of revenue. The treaty of Utrecht and a proclamation of George III. are the basis of their claims.

## Plan Junior Police Force

Will Be Similar To Royal Canadian Mounted Police

Ottawa.—Modelled on the Royal Canadian Mounted Police system, a junior police force is to be inaugurated in Ottawa. The force will have no practical work to do at first, but it is hoped eventually it will be recognized by the police department. Formation of the junior corps will, it is expected, reduce juvenile delinquency. Officers of the juvenile court and a local service club leaders are in the movement.

W. N. U. 1806

## Church Union In Scotland

Large Crowds Were In Attendance At Ceremonies In Edinburgh

Edinburgh, Scotland.—October, 2 was an epoch-making day in Scottish ecclesiastical history. The union of the United Free Church and the Church of Scotland took place in the great Hall of Assembly on Annandale Street.

It was a day of joyful thanksgiving. Church bells were pealed, the school children had a holiday, and the Assembly Halls were brilliantly illuminated by flood lighting.

The Assembly Hall was transformed into a scene of great beauty and dignity for the celebration of the act of union. Formerly it was a motor car garage, but it held 15,000 persons who represented all aspects of Scottish life, and all the Christian churches of Europe and the Dominions.

Intensive emotion made dramatic the signing of the act of union by the moderators. By this act the churches became merged into the Church of Scotland. Rev. Dr. John White, of Glasgow, had the honor of becoming the first moderator of the new and greater body.

## Grain Ships Tied Up

Boats On Lower Lakes Have Had Slack Season

Montreal.—Eleven lower lakes bulk freighters of the Canada Steamships Lines have been placed in winter quarters at Kingston, on account of continued depression in the grain situation it is announced here. These vessels have been tied up during the larger part of the season and prospects for cargo during the next two months failed to justify their maintenance in commission.

In view of the fact that grain shipments have been small this summer and more particularly during the last three months, it is expected there will be a heavy movement next year as soon as navigation opens to Montreal. The grain in the country total stocks on September 20 being 148,674,643 bushels in Canadian elevators and 22,616,658 bushels of Canadian grain in U.S. elevators, and must be moved eventually.

## Saved Many Lives

Taxi Driver Used Ingenious Method To Rescue People In Burning Building

Brooklyn, N.Y.—A handful of footpicks, carried by a cab driver, probably saved the lives of more than 30 residents of a four-storey block here.

The block caught fire while all the occupants were asleep. The taxi driver, whose name was not learned, was in a restaurant across the street. Seeing the smoke pouring from the building, he rushed over and found the hallways filled with smoke.

Returning to the restaurant he grabbed a handful of footpicks. Going back to the burning building, he went from door to door through the hallways, pressing the doorbell buttons in and inserting a footpick to make them ring continuously. All of the occupants got out of the building, which was gutted by the flames.

## Three C.N.R. Ships Sold

Purchased By Navigation Co. For Vancouver-California Service

Vancouver.—Announcement is made that the Kingsley Navigation Company, Limited, has purchased the three steamers of the Canadian National Steamships service to California, and will merge it with the present sailings between Vancouver and California ports. The three ships are S.S. Canadian Rover, S.S. Canadian Observer, and S.S. Canadian Coaster. The vessels will remain under Canadian management. The purchase price was not announced.

## No Cause For Alarm

Ottawa.—That Canada has no cause for alarm regarding changes likely to be made in the existing Fordney-McCumber tariff, was the statement of P. J. McCumber, former North Dakota senator and now member of the International Joint Commission which met here

## INVESTIGATE MOTION PICTURE INDUSTRY

Prof. Kenneth W. Taylor, of the economics department, McMaster University, who has been appointed by the Federal Minister of Labor to conduct, under the Combines Investigation Act, the preliminary investigation into the alleged combine in the motion picture industry in Canada. This preliminary inquiry is to decide as to whether or not a royal commission will be appointed to delve into the matter, and Prof. Taylor expects to submit his report to the government in a couple of weeks.

## Foreign Minister Is Dead

Dr. Gustave Stresemann Was Active In World Peace Movement

Berlin.—Foreign Minister Gustave Stresemann died suddenly October 3. Dr. Stresemann had been in ill-health for months, but recently he had so far recovered as to be able to participate in the arduous conference at The Hague on reparations and the session of the Assembly of the League of Nations at Geneva.

Dr. Stresemann was one of the foremost statesmen of post-war Europe, and with Aristide Briand, French premier and foreign minister, generally was considered one of the most active of the world's peace workers. He was president of the German People's Party, a member of the Reichstag, a former chancellor of the German Republic, and the most widely known member of the present cabinet, headed by Chancellor Mueller.

Death came as a result of a heart attack after a stroke of paralysis.

## To Test B.C. Coal

Victoria, B.C.—At a meeting of fuel experts here, presided over by Hon. W. A. MacKenzie, Minister of Mines, ways of developing and widening the market for British Columbia coals were discussed, with the result that it was decided to send a sample carload of forty tons from the various collieries in the province to the new laboratory at Ottawa for testing purposes.

## Much Impressed by West

Hector Charlesworth, editor-in-chief of the Toronto Saturday Night, and author of "Candid Chronicles" and "More Candid Chronicles," has been travelling over Canadian Pacific lines throughout the West on a combination holiday and business tour this summer. He is here seen in the grounds of the Empress Hotel, Victoria, which he visited for the first time since its construction. He was greatly impressed with the rapid growth and development of the entire city of Victoria.

## Would Prefer Being Ousted By Britain

But Nova Scotia Hopes To Sell Coal In Canada

Halifax.—If Nova Scotia is to be ousted from the home market in Canada it would be preferable to have it done by British coal rather than U.S. coal, though the result is largely the same for Nova Scotia mines, it is a statement issued by Hon. G. B. Harrington, in which the Nova Scotia Minister of Mines declares there is no promise for improvement in the Nova Scotia coal trade in the proposal of Rt. Hon. J. H. Thomas to organize what shipments to England and return English coal in the ships.

Hon. Mr. Harrington coupled his statement with an appeal for a national policy which would secure the Canadian market as far as possible for the coal producers of Nova Scotia and Alberta.

## Dog Causes Boy's Arrest

Did Not Bark and Police Figured Burglar Was Known

Toronto, Ont.—A 15-year-old boy was arrested charged with the theft of jewelry valued at \$3,000 from the home of Samuel Langdon, here. The arrest was brought about by the silence of the Langdon's pet dog, which had kept silent while the boy stole the jewelry from a miniature safe.

When Mrs. Langdon told detectives that she thought it strange that the dog had not raised any commotion, that at once narrowed their search down to people whom the dog knew. They questioned the boy and he finally confessed, they claim.

## British Youth Seriously Hurt

Loses Leg When "Riding Rails" En Route To West

Port Arthur, Ont.—Sixteen-year-old Sydney Chapman, new to this country from Whitley, Northumberland, England, joyously, "riding the rails" headed for the "Golden West," lies in a serious condition in a local hospital, minus a leg and with his attendants "hopeful he will recover." Young Chapman was found near a track in the Canadian Pacific Railway yards with his severed leg lying 50 yards further down the spur. It is presumed he had attempted to jump from the freight train on which he was riding and had fallen on the rails.

## Business Still Increasing

Regina.—The local post office, which has been claimed as the office doing the greatest business in the Dominion per capita of population of the city, showed a general increase in business for September over the corresponding month in 1929.

## TRADE RELATIONS WITH RUSSIA WILL BENEFIT CANADA

Vancouver.—Resumption of relations with Russia is one of the most important things which can happen in development of Canada's trade in the opinion of Sir John Ald, president of the Bank of Commerce, who was in Vancouver, en route to Japan, where he will represent Canadian bankers at the Institute of Pacific Relations Congress.

"It is unthinkable that present conditions can continue," said Sir John in the course of an interview. "By resuming relations with Russia I believe Britain and Canada will get a good part of the trade now being enjoyed by Germany and the United States."

While Russia is not listed among countries which will be represented at the congress, Sir John is hopeful that it will take some part. He believes this is of vital importance as a factor in better relations in the Pacific, Transportation and radio. Sir John believes, will play an important part in deliberations of the congress. While countries are not bound when the decision of their delegates he believes the meeting will have a beneficial effect on business and relationships.

## Outlines Policy Of Labor Government

Secretary For Foreign Affairs Addresses Annual Conference At Brighton

Brighton, England.—Palestine will remain a national home for the Jews. British evacuation of the Rhineland will be complete by December 14; no pledges have been promised in securing agreement with Russia on exchange of ambassadors; and a new treaty with Egypt will be made when the people of Egypt signify they are in support of any Egyptian government.

These are cardinal points of an outline of the Labor Government's policy on the outstanding foreign and empire questions of the day, given by Rt. Hon. Arthur Henderson, secretary for foreign affairs, at the Labor party's annual conference here. Mr. Henderson's address also included a strong plea for support of Britain and the United States, and the statement that the negotiations had reached the stage where it was hoped that Japan, Italy and France would soon be able to join in.

The foreign secretary declared that when with the dominions, "with whom, of course, he acted in close consultation," the British government signed the optional clause and thereby expressed adherence to the court of international justice at The Hague, "it gave a fresh impetus to the cause of international arbitration."

But signature to the optional clause was not enough, though it provided for compulsory arbitration of international legal disputes. The British Government, said Mr. Henderson, was giving "most earnest consideration" to compulsory arbitration of other classes of disputes. When that problem was settled the government would have paved the way to more than all-round reductions in armaments than ever before was contemplated.

## Not Worried Over Deficit

Experts Say Situation In Britain Is Quite Satisfactory

London, England.—A deficit of \$360,000,000 is revealed in the government revenue returns for the first six months of the financial year, it is announced. But the situation is regarded by experts as being not unsatisfactory, inasmuch as the deficit is \$20,000,000 lower than for the corresponding period last year. Rt. Hon. Winston Churchill, as chancellor of the exchequer until a few months ago anticipated a reduction of \$60,000,000 in the revenue over the whole year.

St. Gothard's tunnel in Switzerland is 5,900 feet below the peak of the mountain Katchehora.

## The Renaissance of the English Folk Dance

"Merrie England" and the spa-  
cious days of Queen Elizabeth with  
Maypole and Morris Dance are  
being given new life in the Old  
Country within the present century  
and so great is the popularity of  
the revival that Hyde Park, the  
great London rendezvous of rank  
and society, has been gay with  
annual festivals of folkdancers in  
colourful motion. A century of  
industrialism has not been suf-  
ficient to kill the ancient urge and  
Cecil Sharp, thirty years ago, was

astonished to see countrymen in  
an English village, fantastically  
apparelled, come dancing through  
the snow one Boxing Day to the  
strains of a concertina. Eleven  
years later he founded the English  
Folk Dance Society which today  
has a membership of 15,000 with  
over fifty branches. Certificated  
teachers from this society have  
been doing excellent work in  
Canada and will be encouraged  
greatly by the visit to this country

of sixteen of the best English  
dancers from the parent society  
under the leadership of Douglas  
Kennedy for a series of demon-  
strations at the forthcoming Eng-  
lish Music Festival at the Royal  
York Hotel, Toronto, November  
15-18 next. Lay-out shows groups  
of folkdancers; an English Folk-  
dance; and Douglas Kennedy,  
leader of the English Folkdance  
Society accompanied by Joan  
Sharp, daughter of the founder,  
with pipe and tabor.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes interested in John Perry, Al's close friend, and Perry begs her to leave Al. One night, after Al has taken Molly home from the Club Bombo, where he is part owner, she turns on him in rage, saying she doesn't love him. Al believes it is a mood, but when Molly fails to appear at the Club Bombo New Year's Eve celebration he calls her. A feminine voice answers, but he cannot hear the words, as the phone door flies open.

### CHAPTER XVI

Once more Al seized the door of the phone booth and slammed it hard—to stay shut this time. Then he turned back to the phone. He suddenly decided that he must make things up with Molly now—he would cast all pride aside and frankly beg her to do it.

"Sweetheart," he pleaded, "let's start the new year right. If there's anything I've done, I'm sorry. Let's make up."

There was a long silence, then the faint murmur of a feminine voice, whose words he didn't understand. A start of fear shot through him, but he persisted.

"I love you, Molly; you know how I love you. I can't bear to have you cold toward me!"

Now the voice at the other end was stronger; he suddenly realized

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of that headache or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Aspirin tablets to relieve, and they don't affect the heart. All druggists, with proven directions for various uses which many people have found invaluable in the relief of pains and aches of many kinds.

**ASPIRIN**  
Aspirin is a Trademark Registered in Canada

W. N. U. 1906

It was not Molly's voice at all, but the maid's. He heard her quick, distraught words come travelling over the wire like bullets.

"Mrs. Stone is not here. She has gone away."

"Gone away!" Al exclaimed. What do you mean?"

"Yes, sir; Mrs. Stone has packed up her things and gone. She left a letter for you."

Packed her things! Left a letter! Al felt the receiver slipping from his numbed fingers. Why, it couldn't be true; it mustn't be true! Through the glass window of the phone booth he saw the gay dancers, the muffled sounds of their rejoicing reached him in a tantalizing murmur. He felt as if he were far away from them, completely isolated by his dreadful predicament. Molly had decided to leave him on this night of nights!

He fumbled for the dangling receiver and called again.

"Hello! Hello!" he shouted frantically.

"Yes, sir," The maid was still there.

"Please, Celeste, take good care of my boy until I come home. I'll be there in five minutes."

Again that uncanny pause, and then:

"I'm sorry, Mrs. Stone took Junior with her, sir."

Al nerved himself for a last effort. "I'll be right home. Then he dropped the receiver limply and tried to open the phone booth door. But the dancing crowd had overflowed the floor and was jammed in the narrow floor space against the door. Their bodies held it tightly closed, as they swayed back and forth, singing, crooning, dancing, but hardly moving in their tracks.

Al gazed at them helplessly; it was as if these careless revellers were deliberately trying to frustrate him tonight.

Then he sent the door open with a mighty shove, just as the lights, which had been dimmed, went on, and the music stopped. The sirens outside were still proclaiming the arrival of the new year—the couples stumbled over one another and over Al in their hilarity. But he saw and heard nothing. He moved restlessly but quietly through them, his eyes straight ahead, a look of stricken tragedy on his face.

They were too addle-headed to see that look. As soon as he was recognized they pushed about him, clamoring for a song. A hand was held up, tendering a glass of champagne, but Al gently pushed it aside. A girl suddenly threw her arms around his neck and kissed him. As soon as he escaped a man caught him by the arm, calling his attention to his dancing partner and begged Al to meet the "sweetest little girl in the whole world." Al did not smile or pause; he simply moved through them with one consuming thought—to reach home and find out about his boy. Then, finally, some of the more sober revellers realized that this popular master of ceremonies, this man they thought they knew, was like a grim-faced stranger in their midst. And they drew back quietly and let him pass.

He reached the lobby and went out into the night barched. The sidewalks were impossibly jammed—horns were blown raucously in his ears, a girl threw confetti in his face, blinding him temporarily.

Somewhat he reached the curb and looked wildly about for a taxi. There was none in sight, so he started to run, dodging through the overflow crowd and among the motor cars. Some persons, seeing this barched man, with the hurt intent eyes, running as if, for his life, stopped and stared wondering what had happened. He reached the apartment house, breathless and exhausted, dashed into the elevator, ran through the hallways, flung open the door of his home. Celeste, the maid, confronted him, an expression of intense pity in her eyes.

Al dashed by her, standing in the middle of the drawing room, looking about wildly. The room appeared just the same, but there was a strange silence in the apartment. He was about to rush toward Molly's room or the nursery when he saw Celeste before him again, holding out a letter. He seized it and the maid discreetly retired.

Al had a terrible dread of opening it, but he nerved himself to the task and ripped back the envelope flap. Then he read the fateful message in Molly's distinctively vertical handwriting:

"Al—  
"I'm leaving—don't try to persuade me to come back. I don't love you—I never did love you. It was hard enough to bear before John Perry came into my life. Since then it has been impossible."

Al looked up from the letter with a cry of rage and pain. For the first time he saw the whole situation in one blinding flash. Molly not only failed to love him, but she loved someone else. And that someone was John Perry—naive, immaculately dressed John—who, Al had believed, was his best friend. He realized now that Perry, whom he had trusted implicitly, had betrayed that trust from the first. Then another phase in the letter seemed to throb inside his brain—Molly said she had never loved him. She had loved a lie from the moment she said she would marry him!

For a moment this sense of bitter rage and contempt dominated all other thoughts and emotions in him. The sense of being cheated, not only once, but consistently for days, weeks, months, years, made him long to turn on both Molly and John Perry and blast them with scorn. He recalled the countless times he had overlooked Molly's petulant moods, selfish caprices and savage outbursts of anger, always believing that she was loyal and fine underneath.

Now, suddenly, his thoughts turned to Junior, and he read on:

"I was going to leave the baby, but he woke up as I was leaving. He held out his arms to me and, after all, he is more mine than yours."

"MOLLY."

Al ran to the nursery. The dresser drawers had been pulled out and there were evidences of hasty packing all about. Some of Junior's toys lay scattered about the floor, among them his favorite, a woolly dog. His pillow had been thrown in the corner.

Al stood, dazed, gripping the footpiece of Junior's bed. Where had Molly taken his boy?

For a moment Al was possessed by the determination to find Molly and Junior tonight—then he realized that the plan was futile. In this city of seven million persons and countless skyscraper hotels Molly and John Perry could have taken Junior, hiding away without difficulty.

After that note Al did not doubt that Perry was with Molly. Perhaps even now they were speeding toward Boston in Molly's Rolls-Royce, or they might have caught the night limited for Florida several hours ago. He went quickly to the phone and called up the garage.

(To Be Continued.)

The Oil For the Farmer—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a four-footed creature from the doctor. It is only good for the children when taken with colds and croup, and for the horses when they have colds and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

In Bolivia all the useful minerals belong originally to the state.

For Sprains—Use Minard's Liniment.

### Says Farewell To Regiment

The evacuation by the second battalion of the Leicestershire regiment, the first complete British unit to leave the Rhineland, brought stirring farewell scenes. Practically the entire population turned out in the drenching downpour of rain to wish the soldiers godspeed.

### GOOD IN EVERY WAY

Baby's Own Tablets Banish Babyhood and Childhood Ailments

A medicine that all mothers praise—one good in every way—one that will quickly banish the minor ills of babyhood and childhood is the medicine to keep in the medicine chest; to always have on hand in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful in all ailments they are a mild but thorough laxative which by regulating the bowels and stomach banish colds and simple fever; correct constipation and indigestion; relieve colic and diarrhoea and make the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Brunley, Westmeath, Ont., who writes:—"I have four children and whenever any of them are ill I always use Baby's Own Tablets and have found them good in every way. I would not be without the Tablets and would also like your little booklet 'Care of the Baby in Health and Sickness.'"

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

All things come to those who wait—except the man who owes you money.

### Courtesy Of The Road

Majority Of Drivers Have To Suffer For Carelessness Of Selfish Ones

The majority of drivers are without doubt, safe and considerate; but unfortunately all road users are at the mercy of an ignorant and selfish minority, who seem to imagine that a display of recklessness will be mistaken for an exhibition of proficiency. The cult of the cheap car has not been attended by a corresponding cultivation of good manners. Until the quick-tempered, self-centred motorist learns that there is a code of courtesy which must be adhered to on the King's highway, the innocent will continue to suffer for the sins of the guilty.

The up-and-coming young man is pretty likely to succeed, unless he is up at four and just coming home.

Neon light signs are now popular in China to advertise restaurants, business houses, and newspapers.

### Good For Cattle

Keep Minard's in your barn for distemper and colic. An excellent first aid for your stock.

## Ideal--Wherever alterations are required

IN many a fine, old-fashioned farm house there are rooms much larger than people today consider necessary. This available space can be partitioned off into extra rooms with very little work and at surprisingly small cost by the use of Gyproc Fireproof Wallboard. And the Gyproc walls and ceilings of the new rooms will match the older walls—no matter how solid they are—for seasoned rigidity, good looks and permanence.

Gyproc is the perfect building material for all modern farm construction—for homes, barns, poultry houses, granaries and garages. It is pure rock—cannot warp, shrink or burn. With the use of joint filler and tape its sections meet in a tight, flush joint that insures a flat, smooth surface and takes any decoration.

Read, ceiling-high sections of Gyproc are nailed directly to joists and wall studs, no plaster or other construction is required.

Beautiful decorative effects can be obtained by staining, painting, paper or paste right over Gyproc walls and ceilings.

## Calendar.

- OCTOBER—  
11—Jura Councillors meet.  
13—Waltham League's Social Evening.  
14—Cash Store closed.  
14—Cafeteria Supper at United Church, from 5 to 7.  
22—R P Shaw's Auction  
23—District Court opens in Stony Plain.  
23—Chicken Supper and Bazar.

## United Church Notes.

Among the many interesting features of our recent services was a special solo by Mrs Yeatts on the evening of Oct. 6. This was greatly appreciated.

At Spruce Grove on Sunday morning last Mr A C Grant, of Edmonton, gave a special address on Self Imposed Law. Mr Grant is a barrister by profession. At the same service the Stephenson sisters sang several selections.

At Holborn a splendid service was held in the afternoon, when the Stephenson sisters sang several selections and also spoke.

The climax for the day was reached when at the S. S. Rally in the evening a most outstanding program was given by the pupils under the leadership of Mrs Gates. Miss Ruth Wright was organist. The congregation was even beyond our accommodation. This service concluded with a beautiful duet by Stephenson sisters.

## Carvel Clippings

The people of Carvel district are expressing sympathy for Mrs M Ronensky, in the loss by fire she sustained the morning of Sept. 30th. This lady has a young family to provide for, and a sick husband to tend, and was figuring on this year's excellent crop to clean up her indebtedness. The opinion is held that the stacks were set afire, and that the Police should spare no effort to bring to justice the perpetrators of this outrage.

The several road gangs that had been working on Blueberry end of the Baseline pulled for home the latter part of last week, and the road was thrown open to the motoring public.

There was a Community dance at Ukrainian hall Saturday night, which was well patronised.

## Railway Time Table

Going East—Mon., Wed., Fri. at 6.45; every morning at 5.43.  
Going West—Sun., Tues., Fri. at 13.25; every midnight at 24.24.

## GIRL WANTED.

- 20 30 Wallis Tractor

OLAF OHLSEN,

Phone R1516, Stony Plain.

## Stony Plain and District.

Mr and Mrs G Gledhill left Monday, on a trip to the Old Country.

The local Women's Institute met yesterday, at the home of Mrs J Becker.

Mr Harold Brunet, who had a very successful sale last week, left by motor for his old home in Idaho. After a short stay there, he intends to return with his family, and will probably settle in Peace River district.

Rev. Prof. Reidel, of the staff at Concordia College, had charge of the service at St Matthew church (Missouri Synod) on Sunday last.

Mr and Mrs George Bauer, who have lived in this district for several years, have moved to their farm in Claresholm district.

A Cafeteria supper will be served in the United Church Stony Plain, Monday next, Oct. 14th, from 5 to 7 o'clock. A short program will follow, for which a small admission will be charged.

The Comisarow Family were visitors in Edmonton over the week end.

Careless motorists will be shocked when they learn that Jack McLeod was given a jail term of six months by Magistrate Primrose, on Saturday last. It was the car Jack was driving that broke Jacob Pepernich's leg, in an accident on the Baseline, a short time ago.

Mr A E Brunelle, Singer Sewing machine man, toured the Stony district this week.

Members of Moose Lodge held their regular meeting on Monday night, in the Town Hall.

## At the Bar

Magistrate Williams had another busy day on Tuesday. He opened at 1 p.m., with a Juvenile Court case—three boys from Acheson district who were charged with damaging a threshing outfit. Mr Hill, of the Neglected Children's Dept., was present. H A Mackie, K.C., represented the prosecution. The case was adjourned, to be re-opened in Edmonton.

A thresherman paid \$25.00 and costs for an infraction of sec. 25, The Noxious Weeds Act.

A resident of Mewassin district paid \$20 and costs, having been found guilty of an offence against the G.L.C. Act.

After some evidence had been taken in the case of a young man of Spruce Grove district, charged under the V & H T. Act, this case also was set over for a week.

The Court adjourned about 9.30 p.m.

## Spruce Grove News

The Ladies' Aid of the United church held their regular meeting Thursday last, at the home of Mrs Brabbin. The L-A is arranging for a chicken-supper, to be held early next month.

Rev Michael Leamy, a native of St. John's, Nfld. and a graduate of Halifax Seminary has been appointed to assist Rev Father Keenan. Father Leamy offered Holy Mass at Stony Plain & Spruce Grove on Sunday last.

Mrs MacKean and Mrs Morrow made a motor trip to the City on Saturday last.

A short time ago, when one of the railway work trains was here, a chap who said he was a foreman borrowed Mr Loeblich's 22 rifle. Mr Loeblich would like to have the firearm returned, as he intends killing a hog this week.

One evening last week some mischievous person removed the carburettor from the tractor of Mr Hilaire Heber's threshing outfit, closing down the outfit for a day. The Police are investigating the whereabouts of several suspects the night in question.

For Sale—100 bu. of Netty Gem Potatoes. H Loeblich.

## What Would Happen ?

The newspaper organ of the line elevators in the United States asks what would happen to the farmers if the elevators would shut down. We ask what would happen to everybody if the farmers decided to quit producing!—Exchange.

## NOTICE

IN THE ESTATE OF JOSEPH M. KULLANDER, late of Stony Plain in the Province of Alberta, Farmer, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Joseph M. Kullander, who died on the 27th day of May, A. D. 1929, are required to file with the subscriber, Solicitor for the Administratrix, of his estate, by the twenty-fourth day of November, A. D. 1929, a full statement duly verified of their claims and of any securities held by them, and that after that date the Administratrix will distribute the assets of the said estate among the parties entitled thereto having regard only to the claims of which notice has been so filed or which shall have been brought to her knowledge.

DATED at Stony Plain this 7th day of October, 1929.

JAS. MALLOCH,

Solicitor for the Administratrix.
